PROFESSIONAL SUMMARY

BSc IT graduate and Software Developer with experience in enterprise systems and full-stack applications. Skilled in IBM i RPG, C#, Java, SQL, and [ASP.NET](#) Core, building REST APIs and cloud-based solutions. Currently an IBM i Developer focused on designing, debugging, and enhancing business-critical systems.

EDUCATION

North-West University

BSc in Information Technology

Relevant coursework: Object-Oriented Programming, Data Structures & Algorithms, Databases, Cloud Computing, Systems Analysis & Design, Computer Networks & Security

Vanderbiljpark, Vereeniging

Feb 2022 - Nov 2024

SKILLS & COMPETENCIES

TechStack: C#, Java, SQL, Python, [ASP.NET](#), REST APIs, Azure, IBM i (RPG), DB2, Git, Visual Studio, VS Code
Competencies: Problem Solving, Debugging, Communication, Team Collaboration, Adaptability, Attention to Detail

WORK EXPERIENCE

Nashua LTD

Junior Software Developer (IBM i / RPG)

- Develop and maintain enterprise applications using structured programming and SQL, with a focus on performance and reliability
- Design and implement business workflows, including data validation, paging, and batch processing
- Collaborate with stakeholders to deliver technical solutions, applying SDLC practices across testing, debugging, and deployment

Woodmead, Johannesburg

Dec 2025 - Present

Momentum Metropolitan

RPG Developer Intern

- Built a strong foundation in RPGLE and IBM i development, working with embedded SQL, subfiles and legacy system architecture
- Gained hands-on experience maintaining and enhancing enterprise systems, improving debugging, problem-solving and performance optimization skills

Centurion, Pretoria

Feb 2025 - Dec 2025

PROJECT EXPERIENCE

Portfolio Web Application (Full-Stack)

Feb 2026 - Present

- Built and deployed a full-stack application using C# (.NET 8) and [ASP.NET](#) Core Web API on a cloud platform
- Designed and implemented 7 RESTful API endpoints following clean architecture and best practices
- Developed a responsive frontend using HTML, CSS, and JavaScript
- Implemented key features including dark/light mode, filtering, animations, and contact form integration

Momentum Life Order Entry System

Oct 2025 - Dec 2025

- Developed an interactive order entry system using RPGLE and embedded SQL on IBM i, enabling efficient capture and management of customer orders
- Implemented subfile-based navigation with paging to handle large datasets with optimized performance
- Built business logic for order validation, pricing, and VAT calculations, ensuring data accuracy and reliable transaction processing
